

Job Summary:

The Car Processing Manager is responsible for overseeing the efficient and safe dismantling, processing, and preparation of vehicles for the pick a part, recycling, or disposal. This role involves leading a team, ensuring compliance with safety standards, coordinating daily workflow, and maintaining quality control over processed vehicles and parts.

Key Role & Responsibilities:

- Work alongside and supervise the car processing staff in vehicle intake, dismantling, fluid draining, part removal, and scrapping.
 - Ensure all vehicles are processed according to company standards and environmental regulations.
 - Maintain accuracy with vehicle paperwork.
 - Inspect processed vehicles for compliance before they leave the Processing Center.
 - Train team members on proper handling of tools, equipment, and hazardous materials.
 - Coordinate with your supervisor to meet daily and weekly processing targets.
 - Monitor performance, provide feedback, and report staffing or operational issues to your supervisor.
 - Maintain cleanliness and organization in the processing area.
 - Operate and maintain equipment such as forklifts, loaders, and fluid recovery systems.
 - Enforce workplace safety policies and participate in regular safety meetings.
-

Qualifications:

- High school diploma or equivalent required.
 - 2+ years of experience in auto dismantling, recycling, or a similar automotive environment.
 - Previous leadership or supervisory experience required; 2 years minimum.
 - Knowledge of vehicle systems and basic auto mechanics required.
 - Strong organizational, communication, and time management skills.
 - Ability to operate heavy equipment and hand tools safely.
 - Valid driver's license required; forklift certification a plus.
-

Physical Requirements:

- Ability to lift up to 50 pounds regularly.
 - Work in outdoor conditions year-round.
 - Standing, bending, and manual labor for extended periods.
-
